Internship invitation

About MeritStory

At MeritStory, we design and develop high-quality custom software products for our clients across a wide range of industries.

We are a small but growing group of individuals who take pride in performing quality work. We see each project not only as an opportunity to apply our accumulated experience but also as a learning process. We constantly modify and improve our workflow based on the feedback loops, aiming to develop software with fewer defects while keeping productivity high at a sustainable pace.

Position

As a software engineer at MeritStory, you will be joining a cross-functional team of experienced individuals.

You will spend most of your time producing high-quality code backed by tests for our client's projects. But since the process is an ever-changing one, you will also be welcome to participate in planning, workflow improvement, retrospection, research, and technical design activities.

Our typical project takes anywhere from 3 to 12 months, so you will have the opportunity to widen your knowledge by touching on a multitude of business problems while working alongside the same colleagues.

Requirements

Ideally, a candidate for this position should meet the following requirements:

- Attention to detail and high personal standards of quality.
- Open-mindedness and willingness to question current practices and learn new things.
- Passionate about producing efficient, well-structured, and understandable code covered with tests.
- Experience with modern PHP (PHP7 and later) and MVC frameworks (like Laravel, Symfony, Zend, or Yii2).
- Experience with designing and developing RESTful APIs.
- Experience with handling relational databases (e.g. MySQL, MariaDB, or PostgreSQL).

- Proficient communication in English.

Bonus points for:

- Experience with DDD.
- Experience with deploying to cloud infrastructure (AWS, GCP, or other).
- Experience with automated testing.
- Familiarity with DevOps and the 12 factor app architecture.

Do not hesitate to apply if you do not meet some of the requirements. We appreciate personal values and talent the most, while everything else can be learned.

Why MeritStory?

- Join a small group of motivated individuals where engineers make actual decisions and where everyone, including the founders, participates in hands-on software development.
- Participate in various meaningful projects: make healthcare more intelligent, accounting processes more efficient, financial transactions more trustworthy.
- Flexible working schedule and location (work either from our Vilnius office or remotely).

Apply now!

Please send us your resume with an optional cover letter to info@meritstory.com or reach us here via LinkedIn, and we will get back to you in a few days.
